■ Disinfectant ■ Sanitization ■ Sterilization

Properties Disinfection

- Must be effective against a wide variety of infectious agents like
 - ❖ GM +ve bacteria
 - ❖ GM -ve bacteria
 - ❖ Acid fast bacteria
 - ❖ Bacterial endospores
 - ❖ Fungus
 - ❖ Viruses
- Should be effective at low concentration
- Soluble in water and lipid for penetration into microorganisms
- Low surface tension so that it can enter cracks in surfaces

Covid - 19

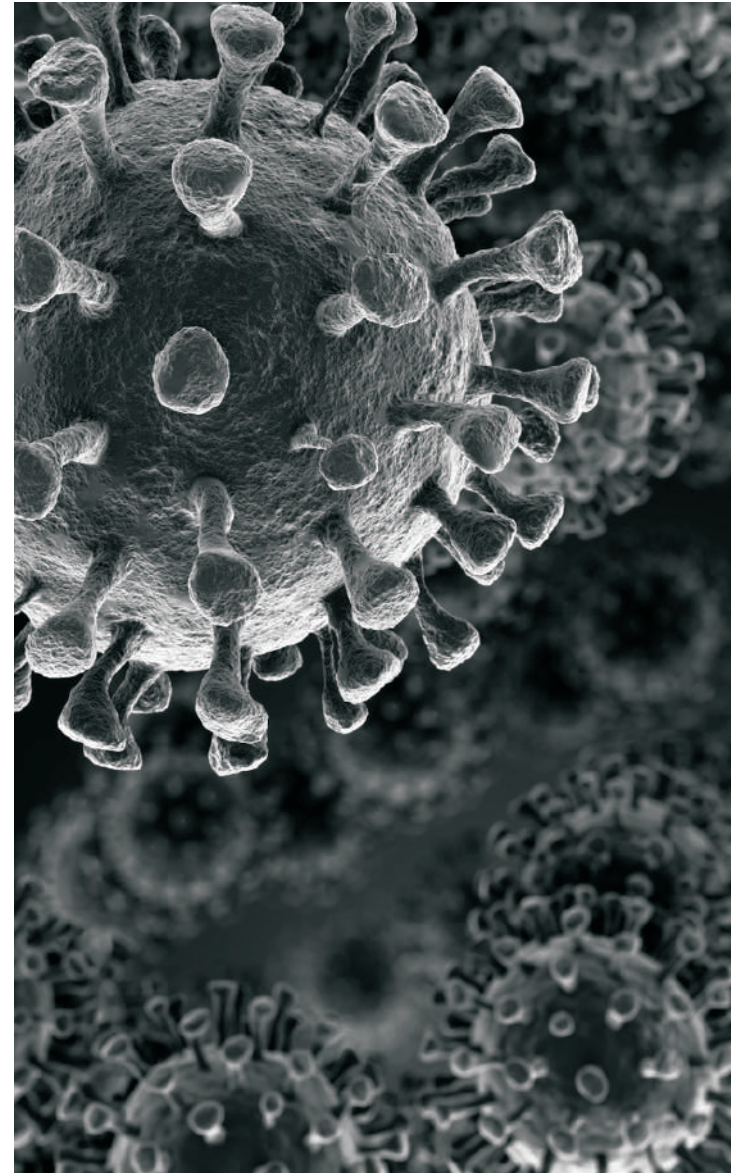

- Latest weapon in our arsenal against this deadly virus is called

Anti Microbial Treatment

- Cleaning surfaces of all our transport modes, our office and public places is not sufficient enough at this moment.

The need of the hour is “Critical Disinfection and Disease Preventative treatment to stop Cross Contamination”

In the utmost important fight against COVID-19 in the World, Pestocop is extending its highly effective treatment against this contagious and lethal virus.
